bott cubio in practice

Multimatic Motorsports

"We were delighted to be able to work with bott again on the fit out of the new building. They did an excellent job for us at Greatworth Park and the work at Arrow Park for our new building is even better – a truly outstanding service of which all the team members are very proud."

George Howard-Chappell, Team Principal.

bott perfo in practice

National Railway Museum

"Our challenge was to find a product that not only complimented the aesthetics of the museum, but provided a solution for harnessing information. The perfo hook kits for the panels were perfect for displaying object showcases, giving us endless possibilities for re-positioning. The Testing exhibition is all about experimentation and engineering brilliance and the bott panels integrate perfectly."

Jamie Taylor, Exhibition Project Lead
National Railway Museum.

cubio | **Mobile** Features & Benefits

Robust Housing

Bott cubio cabinets have reinforced steel housings to ensure high total capacity. Huge range of plan sizes and heights.

50kg Drawers

Standard fitment drawers are 50kg U.D.L. capacity with full 100% extension roller bearing slides and scuff resistant galvanised pans.

Dividers

Tough, sub dividable plastic troughs, removable plastic boxes and adjustable metal dividers allow multiple separation possibilities for efficient and tidy storage.

Drawer Blocking & Locking

All cabinets are equipped with a blocking mechanism to prevent more than one drawer from being opened at a time. Drawer safety interlocks prevent accidental opening whilst in transit even if unlocked.

Worktops & Top Trays

To prevent roll off mobile cabinets are fitted with a top tray with four raised sides and quality inlaid mat. 20mm thick multiplex or lino faced worktops are also available for bott cubio maintenance trolleys.

Castors

High quality castors are used throughout the range. Swivel and brake versions enhance mobility and stability.

CNC | Inserts & Carriers

Tool Holding Inserts

The core of the system are the easy fit tool holding inserts. 50, 75 or 100mm wide depending on model, they simply clip into the metal carrier or frame.

To calculate the insert capacity compare the tool type sections with the available sections per row in the metal carrier or holder.

A blank holder is available for other tool sizes. The solid plug is removed for machining to the required bore dimensions.

All inserts have a taper bore except VDI models. Top diameter shown.

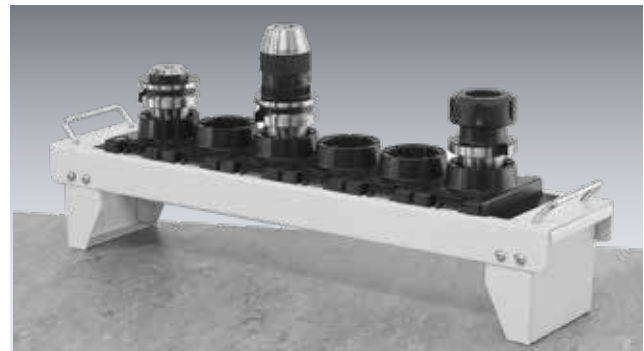

The insert sits 32mm above the metal carrier or holder.

CNC | Carrier Drawer Frames & Cabinets

Tool Carrier - Drawer Brackets

For high volume storage with ease of access and security CNC tooling may be stored in one of the bott cubio static or mobile cabinets.

The cabinets will accept either the tool carrier block via drawer brackets (below) or direct into the tool frame (opposite).

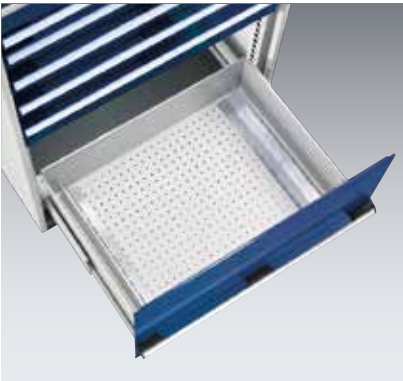

Both systems will work with a wide selection of cabinet sizes, the ideal model will depend upon the length and quantity of tooling.

Please ask for a no obligation quote or on site consultation to discuss your requirements.

Tool Carrier - Drawer Brackets

Tool carriers may be mounted within the drawers using the accessory bracket set. The ideal cabinet is 800mm wide x 650mm deep but the system will work with the larger sizes. Up to 3 carriers may be stored in each drawer.

800mm x 650mm cabinet with carrier brackets.
